RE: OPEN HOUSE - SANFORD DEPARTMENT OF PUBLIC WORKS MALDEN AVENUE REHABILITATION, SANFORD

The Department of Public Works has identified through a draft Pavement Management Program (to be finalized in the fall of 2016) **Malden Avenue** in Sanford for Rehabilitation Maintenance in the form of a 1.5" Hot Mix Asphalt overlay this construction season (2016).

The scope of repair and reconstruction efforts will be:

1. Standard maintenance tree trimming/cutting.
2. Repair and adjustment of underground facilities including:
    a. Storm Water Catch Basin Adjustments (Public Works);
    b. Sewer Manhole Adjustments (Sanford Sewer District);
    c. Water Gate Adjustments (Sanford Water District).
3. Spot pothole repair as necessary;
4. A drag shim of sand mix to level the roadway;
5. 1.5" of 12.5 mm Hot Mix Asphalt pavement;
6. Grinding and paving of driveway aprons in order to match into the new roadway surface correctly.

The Department is in the process of identifying more effective ways to maintain the roadway surface and prolong the lifetime of roads that have aged to just-beyond crackseal deterioration. This street was selected from many potential candidates to receive this treatment.

The Department of Public Works will be hosting an **Open House** at our offices located at 156 School Street in Sanford on Tuesday, August 30, 2016 from 2:00 pm to 4:00 pm to discuss the scope of work and address concerns from Residents and stakeholders. No formal presentation will be made but you are encouraged to attend, ask questions, and express your concerns. Should you be unable to attend this meeting, please fill out the comment card on the reverse side of this letter and return to our office at the address noted above or fax to (207) 324-9133. If you would like the Department to reach out to you, please include your contact information.

Sincerely,

Matthew E. Hill, P.E.
Director of Public Works
