**RE: OPEN HOUSE - SANFORD DEPARTMENT OF PUBLIC WORKS
MILTON AVNUE, CHANCERY LANE, & JACK LANE**

The Department of Public Works has identified Milton Avenue, Chancery Lane, and Jack Lane for Preventative Pavement Maintenance in the form of a Chip Seal this spring.

The scope of repair and reconstruction efforts will be:

1. Crackseal or drag shim overlay followed by;
2. A half-inch course of asphalt rubber chip seal.

The Department is in the process of identifying more effective ways to maintain the roadway surface and prolong the lifetime of roads that have aged to just-beyond crackseal deterioration. This portion of the neighborhood was selected from many potential candidates to receive this treatment. While the chip seal treatment may be new to southern Maine, it has been widely utilized in the northeast in neighboring states and is becoming more prominent in New Hampshire and southern Maine.

The Department of Public Works will be hosting an **Open House** at our offices located at 156 School Street in Sanford on Friday, March 25, 2016 from 11:00 am to 1:00 pm to discuss the scope of work and address concerns from Residents and stakeholders. No formal presentation will be made but you are encouraged to attend, ask questions, and express your concerns. Should you be unable to attend this meeting, please fill out the comment card on the reverse side of this letter and return to our office at the address noted above or fax to (207) 324-9133. If you would like the Department to reach out to you, please include your contact information.

Sincerely,

Matthew E. Hill, P.E.
Director of Public Works
City Engineer
